An Analysis Document on Social Media: an Academic Tool

N. Ravichandran B. Sc (Ag) M.Sc (Bioinformatics), Agricultural Officer, Seed Testing Laboratory, Cuddalore.

Abstract

The topic “A Analysis Document on Social Media: an Academic Tool” was performed to research the significance of public press in the academic sector. Nowadays the Social media are a typical system for the individuals all over the globe and return to discuss their beliefs, ideas, feelings, customs, lifestyle, information, etc. the idea of Social Media is top of the plan for many businesses

Nowadays. Decision makers, as well as academic professionals, try to recognize methods in which institutions can create successful use of programs through Wikipedia, YouTube, Facebook, Second Lifestyle, and Tweets. Yet despite this attention, there seems to be very limited knowing of what the phrase “Social Media” exactly means; this article intends to offer some explanation. We start by explaining the idea of Social Media, Classification and talk about how it varies from relevant ideas in academia. This research translates that our education and studying system needs change and public press should be widely used for the academic reasons.

Keywords: Social media, press, Social, Press, Facebook, Academic tool, Twitter, Lifestyle, YouTube.

Introduction

Today the globe is backed by the Social media across the limitations of Socioeconomic and Political limitations, thus providing it a typical system for return. Social media technologies take on many different forms including magazines, Internet forums, weblogs, social blogs, microblogging, wikis, social networks, podcasts. The unity of the media has extended the use of the world wide web that delivered public media. Social media reduced the range and a system for typical individuals to discuss the opinions (through blogs), return, social-important times (through Facebook), discussing day to day activity between relationships(WhatsApp), discussing their Views, opinions and opinions regarding the events around them.

Not only this, public media is also being used by the promoters and organizations for their promoting their items, organizations for searching and hiring, learners for internships, beginners for expert perform, instructors and mother and father as public studying resources. Social media is a typical public press system might be, “a device that lets learners, mother and father, and instructors work together online”. The use of public press is endless, the learners also use it to make weblogs, creating expert links, introducing and creating class reports.

Classification of social media

By applying a set of theories in the field of media research (social presence, media richness) and social processes (self-presentation, self-disclosure), Kaplan and Haenlein created a classification scheme in their Business Horizons (2010) article,[9] with six different types of social media:

1. collaborative projects (for example, Wikipedia)
2. blogs and microblogs (for example, Twitter and Tumblr)
3. content communities (for example, YouTube and DailyMotion)
4. social networking sites (for example, Facebook)
5. virtual game-worlds (e.g., World of Warcraft)
6. virtual social worlds (e.g. Second Life)

However, the boundaries between the different types have become increasingly blurred. For example, Shi, Rui and Whinston (2013) argue that Twitter, as a combination of broadcasting service and social network, classes as a "social broadcasting technology"
Use of public Classification of social media as a device in academics:

1. Social Media in Education: Social press is the latest and novel way for education and studying objective. Students should be trained to use this device in a better way in the sessions that just being used for messaging or text messaging rather they should understand to use press for good.

2. Students in Social Media: Students just don’t understand while writing, but it is also essential to involve them into more realistic perform like blogging where they just not write for the instructor but for them to improve their abilities. When they are engaged better, they tend to understand more in realistic sessions.

3. Social Media and Safety: www.k9webprotection.com is one of many free resources that control an on the internet environment while still enjoying public press. Students are to be educated and make attention about effective use of Social media

4. Social Awareness and Individuality: Social media (Face book, Twitter, whatsapp) nowadays is being used to make their area to prove their individual identity in the virtual globe. So learners are created to know that this entertainment mode can also be used for creating public attention and connecting them to more expert and knowledgeable globe.

5. Collaborative Contribution uses Social Media: One way of educating from instructor to learners from a set of notes duplicated to another set of documents without any collaborative participation, leaving no room for both student and instructor from creativeness, rather Social media can be used as a educating device has a natural collaborative element. Students comment on each other’s assignment perform in teams to make content and can easily access each other and the instructor with questions or to start a conversation.

6. Smartphones a bridge: Smart phone Technological innovation has created a link between university and Mother or father, Teacher and Mother or father even Student and Teacher. The learners should be trained to make the best utilization of know-how towards the amount and studying as it can offer information available anywhere anytime.

Objectives of the Study:

1. Importance of the Social Media in education
2. Social Media as a device for academic purpose
3. How instructors comprehend the Social media
4. How it is incorporated in educating techniques.

Hypothesis of the study:

1. Social media significance.
2. Awareness among the Teachers
3. Kids’ information of Social media in academic use.
4. Students look out for more novel ways of educating.
5. Social media can be used for various academic reasons.

Review of Literature

Jayme, Waddington (2011);

It determined that Social social networking among teenagers is not just a fad; it is part of their lifestyle. While Social media can reveal teens to danger, they are exposed to the same risks in the real world as well. A father or mother or instructor cannot anticipate a teen to give up the world wide web and be able to flourish in community as computers, technology, the world wide web, and Social media is used in all aspects of recent lifestyle nowadays, even in the workplace. This is why Social social networking should not only be involved as a valuable device to improve the classroom, but should also be used as an opportunity to teach learners the abilities that ensure safe and enhancing use of Social media.
P. Brady Kevin, B. Holcomb Lori, and V. Cruz Belle (2010);

The greater academic community has been noticeably slow in implementing public press technological innovation into the program. Noncommercial SNSs, like Ning in Education, offer an exciting and impressive alternative for college teachers enthusiastic about the academic advantages associated with Social media technological innovation. Outcomes from this research reveal that for a greater part of learners, SNSs offer significant e-learning advantages in their Courses.

Ozkan and McKenzie (2008)

The researcher deal that teachers need to engage learners with a more Twenty first century approach to educating and Social media technological innovation can offer such a venue. As both on the internet studying and SNSs keep growing, it is becoming increasingly more essential to examine how on the internet studying and SNSs can be combined most effectively

Steven Waldman(2011)

Before the conference, members were requested to make a Tweets account, and bring a laptop or smartphone if possible to the conference. While providing the presentation on using Social media in the location classroom, the instructor is also indicating how to use Social media in the classroom. Therefore, the presentation strategies are paramount to the success of the demonstration and are included in each section of the demonstration. In this project the learners learnt to use the impressive way of using public press like twitter, tumblr, Wikipedia, Poll Everywhere, Boards, Facebook or myspace and Youtube.

Research Methodology

The primary data was collected from newspaper, magazine, online journals, etc.

The secondary data was collected through survey among the Students in a nearby school within the age group of 13-15 years to understand their perception of using the social media as an educational tool. For this, a questionnaire was used as a tool and was filled by 25 respondents which were picked up randomly.

Results

The information gathered from the study has been graphically showed below.
In the query “Social Media Utilization by various experts” asked to the associates the following information have been gathered which is proven graphically.

In the query “Do you think that Social Media should be used for the academic purposes?” requested to the associates the following information has been gathered which is proven graphically.
In the query “Are you conscious of the novel methods of teaching” requested to the associates the following information has been gathered which is proven graphically.

In the query “Why do learners use Social media?” requested to the associates, the following information has been gathered which is proven graphically.
In the query “Rate the following educating strategies as per your preference?” requested to the associates, the following information has been gathered which is proven graphically

![Graph showing the ratings of different educating strategies](image)

**Conclusion**

It is determined that:

- Hypothesis No.1 revealing ‘**Social media importance**’ is approved that social media is essential in every aspect of communication so it is approved.
- Teachers are becoming conscious so Hypothesis No.2 ‘**Educators are conscious of its importance**’ is approved.
- The Students information about public media’s academic use so Hypothesis No.3 ‘**The youth nowadays is not conscious of its academic use**’ is refused.
- Students opt and are enthusiastic about novel way of educating so Hypothesis No.4 ‘**Students look out for more new methods of teaching**’ is approved.
- Social media has opened vast system and can be used for many academic reasons so Hypothesis No.5 ‘**Social media can be used for various academic purposes**’ is approved.

**Discussion of the Result**

- Most of learners believe promoters use Social media for the promotion of their items, followed by its usage by teachers, experts and learners.
- Most of the members fully comprehend about novel and new way of educating and anticipate the same.
- Students believe public press should be used for education and studying reasons.
- The use of public media to make demonstrations and connection was found to be the most important among learners.
- Smart class (Learnxnt and Edupcomp) method of educating is one of the most popular among the learners as it more entertaining and participative than other techniques.
